

Austin & Repatriation Medical Centre gives THELMA first Victorian public health service

The Austin & Repatriation Medical Centre, one of Australia's leading teaching hospitals and medical research centres, has signed a three year User Agreement for THELMA.

The Austin & Repatriation Medical Centre is a cornerstone of the Victorian public health system with over 840 beds and treating approximately 65,000 inpatients and 130,000 outpatients a year from three campuses: the Austin campus, the Repatriation campus and the Royal Talbot Rehabilitation Centre.

ICSGlobal Managing Director Tim Murray said "THELMA has now been embraced by the public health systems in Queensland, NSW and Victoria which is solid endorsement of the product and the value it can add to our national health system."

About ICSGlobal and THELMA

ICSGlobal's core business is the ownership and operation of THELMA. THELMA (Transactional Health Exchange Linking Multiple Applications) is the health industry electronic clearing house. THELMA generates both subscription and transaction revenue through replacing existing manual, paper-based health administration processes with intelligent technologies that allow B2B transactions over the Internet.
