

John James Memorial Hospital goes live with THELMA

John James Memorial Hospital (JJMH), the ACT's largest private hospital, has gone live with THELMA's electronic hospital claims and eligibility checking after signing a three year User Agreement.

Located in the quiet Canberra suburb of Deakin, JJMH and the adjacent Lidia Perin Memorial Hospital which JJMH recently acquired, services a regional population of 518,000 and admits over 17,000 patients per year.

Mr Andrew Clark, the Chief Financial Officer at JJMH, said "The THELMA solution made sense to us, as a single, multi-transaction pipe between our PiMs patient management software and the health funds. Plus the transaction fee model eliminates the risk associated with a large capital investment in a new technology initiative. It's fairly obvious how electronic claiming is light years ahead of the cumbersome manual process that had evolved, in terms of efficiency, accuracy, and improved cash flow."

During the integration to iSOFT's PiMs patient management software at JJMH, ICS effectively "shrink wrapped" the THELMA-PiMs module to accelerate roll out to iSOFT's rapidly growing national customer base of public and private hospitals.

About ICSGlobal and THELMA

ICSGlobal's core business is the ownership and operation of THELMA, a clearing house exchange service for the Australian healthcare industry. For more information visit www.icsglobal.net and www.thelma.com.au.
