

Medilink Solutions signs up to THELMA

Medilink Solutions Pty Ltd, one of Australia's leading developers of Practice Management software for specialists, has signed up to use THELMA to deliver medical claims to Medicare and to the health insurance funds from their highly respected "MEDILINK xp" practice management software.

Since 1989, Medilink have been developing innovative solutions to meet the needs of Australian health professionals. Medilink's customer base stands at over 1,100 specialist practices around Australia.

The General Manager of Medilink, Neville Mander, said that after appraising all options in the Australian marketplace, THELMA emerged as clearly the best eHealth connectivity option for Medilink and their customers.

"Some time ago we connected directly to Medicare and the health insurance funds, but quickly determined that the time and cost commitment required just did not make sense. By using THELMA we are providing our customers with a convenient, user friendly way of submitting claims electronically plus saving ourselves a significant amount of time and cost in maintaining and supporting the link" said Mr Mander.

Medilink have commenced connecting to THELMA's claims services and registering their specialist doctors for electronic claiming. The new electronic services are scheduled to be available to Medilink's customers by July this year.

About ICSGlobal and THELMA

Founded in 1990 as an engineering and IT consultancy, ICS Group listed on the Australian Stock Exchange as ICSGlobal Limited in 1999 [ASX:ICS]. Since 2000, ICSGlobal's core business has been the unique "any-to-any" health industry clearing house technology **THELMA** (Transactional Health Exchange Linking Multiple Applications), which ICSGlobal built, owns and operates. THELMA creates interoperability between the broad range of new and legacy software systems that typically exist in health systems. This enables health industry business partners in any country to conduct financial, clinical and administrative transactions electronically over the Internet.
