### About ICSGlobal and Thelma

Founded in 1990, ICSGlobal listed on the Australian Stock Exchange in 1999 [ASX:ICS]. ICSGlobal's core business is medical banking: combining e-health and outsourced "accounts receivable" services to shift manual, paper-based healthcare administration processes into the realm of online banking. Underpinning the business is our configurable medical banking clearinghouse technology, **Thelma** (Transaction Health Exchange Linking Multiple Applications), which clears and settles healthcare bills electronically over the Internet. ICSGlobal has a dual-edged global growth strategy around medical banking - the expanded deployment of Thelma and the acquisition of established, profitable medical billing companies. In Australia, Thelma went live in 2000 and volume growth continues at over 50% per annum. In 2007, ICSGlobal acquired The London Patient Billing Service (LPBS), the UK's leading company in the outsourced patient billing services sector, which has since been renamed Medical Billing & Collection (MBC). In the US, Thelma's "all-payer" national medical banking network went live in October 2008, and the first medical billing company, Medical Recovery Services, Inc., was acquired in December 2008.
