

**ASX RELEASE – 5 JULY 2006**

## **Police Health signs up to THELMA**

Police Health is the twenty sixth health insurance fund to sign up to use the THELMA service.

Police Health was originally created exclusively for the benefit of South Australian police employees and their families back in 1935. It is the only police-based health fund in Australia.

Police Health has built an excellent reputation for providing very high quality, value-for-money private health cover. A measure of its stature within the South Australian police community is that more than 90% of the State's serving police officers are members.

More recently Police Health expanded its membership eligibility to embrace the health insurance needs of the police community in the Northern Territory, Queensland and Western Australia.

Police Health will go live on THELMA this week.

### **About ICSGlobal and THELMA**

Founded in 1990 as an engineering and IT consultancy, ICS Group listed on the Australian Stock Exchange as ICSGlobal Limited in 1999 [ASX:ICS]. Since 2000, ICSGlobal's core business has been the unique "any-to-any" health industry clearing house technology **THELMA** (Transactional Health Exchange Linking Multiple Applications), which ICSGlobal built, owns and operates. THELMA creates interoperability between the broad range of new and legacy software systems that typically exist in health systems. This enables health industry business partners in any country to conduct financial, clinical and administrative transactions electronically over the Internet. In Australia, THELMA's customer base continues to grow steadily, now standing at over 60% of private health insurers and over 40% of national private hospital beds. THELMA also processes claims into the national Medicare system. THELMA went live in the UK in July 2005. Plans for the rollout of THELMA in the US are being developed with a number of organisations, after THELMA was certified to operate in the US in November 2005. For more information visit [www.icsglobal.net](http://www.icsglobal.net) and [www.thelma.com.au](http://www.thelma.com.au).
