

ASX RELEASE – 9 January 2006

Transaction Volume Update

Transaction volumes through THELMA in Australia continued to accelerate in the December quarter, as shown in the graph below.

The month of December has historically dragged the Quarter down due to the drop off in hospital admissions prior to Christmas, as it did again in this Quarter.

A continuation of this growth trend is expected during the coming year, driven by more contracted customers going live, more transaction types coming on line, more medical software vendors connecting to THELMA, and further growth in our Australian customer base, which currently stands at over 70% of private health insurers, over 40% of national private hospital beds, approximately a third of national medical specialists, about 40% of the national pathology market, and over 100 radiology practices.

About ICSGlobal and THELMA

Founded in 1990 as an engineering and IT consultancy, ICS Group listed on the Australian Stock Exchange as ICSGlobal Limited in 1999 [ASX:ICS]. Since 2000, ICSGlobal's core business has been the unique "any-to-any" health industry clearing house technology **THELMA** (Transactional Health Exchange Linking Multiple Applications), which ICSGlobal built, owns and operates. THELMA creates interoperability between the broad range of new and legacy software systems that typically exist in health systems. This enables health industry business partners in any country to conduct financial, clinical and administrative transactions electronically over the Internet. THELMA also processes claims into the national Medicare system. THELMA-UK is being rolled out across the UK private health sector. Plans for the rollout of THELMA in the US are being developed with a number of organisations, after THELMA was certified to operate in the US in November 2005.
