

ASX RELEASE – 17 July, 2008

## Thelma-US Appoints Vice President

Australian eHealth company ICSGlobal Ltd (ASX:ICS) today said Patti Velasco will join its Thelma-US unit on July 21 as Executive Vice President, Healthcare Transaction Services.

Ms Velasco previously worked with Thelma-US President and CEO, BP Fulmer, for four years at ACS EDI Gateway, Inc., a US Fortune 500 eHealth company.

Ms Velasco was with ACS for 16 years, during which she developed the company's original EDI clearinghouse which grew to processing 720 million electronic health transactions annually, connecting 63,000 submitting organizations. She was also Director of Sales and Operations for several commercial lines of business, increasing revenues by more than 26% annually.

Tim Murray, CEO of ICSGlobal, said the appointment of Ms Velasco is a strategic step in the development of the US business.

"Our Thelma-US operations are now led by two leading executives in the competitive US medical banking market. BP is delighted to again be working alongside his trusted deputy as he fast tracks the revenue potential from transactional and billing company acquisition opportunities," Mr Murray said.

Thelma-US is scheduled to go live with commercial transactions in September 2008. The US healthcare system is the largest in the world with estimates of 50 billion manual transactions (phone, fax, post) annually, the costs of which are estimated to be 20-30% of the national healthcare spend of around US\$3 trillion per annum.

Ms Velasco will continue her involvement in most of the key US medical banking forums, including the Medical Banking Project Accreditation Committee; the Cooperative Exchange, a collaborative group of eight of the largest US healthcare clearinghouses; the Healthcare Financial Management Association (HFMA); and the National Dental EDI Council (NDEDIC).

### About Thelma-US, Inc

Thelma-US, Inc is the Georgia-registered wholly owned US subsidiary of ICSGlobal Limited.

### About ICSGlobal and Thelma

Founded in 1990, ICSGlobal listed on the Australian Stock Exchange in 1999 [ASX:ICS]. ICSGlobal's core business is medical banking: simplifying healthcare payments, helping patients, doctors, hospitals, health insurers and government to get paid or make payments. We do this using our medical banking clearinghouse technology, **Thelma** (Transaction Health Exchange Linking Multiple Applications), which facilitates clearing and settling medical bills electronically over the Internet, rather than the stress, time and cost of filling in forms and trying to work out who owes what to whom. ICSGlobal's global medical banking growth strategy involves the expanded deployment of Thelma in the Australian, UK and US markets, as well as the acquisition of established, profitable medical billing companies, the first acquisition being The London Patient Billing Service in 2007.
